

## **Hundred Million of FX Bonds Sold**

**The Premium Euro Hungarian Government Bond (P€MAK) has been a success from the start**

**Over one hundred million has been sold of the new euro denominated 3-year floating rate bonds that carry a current coupon of 5.1 per cent.**

Since the start of the subscription of P€MAK on November 20, 2012, EUR 104.1 Million were sold. The demand for the securities in the Hungarian government bond market is high due to the lack of similar products. The issue size of the bonds was set by the Government Debt Management Agency Private Company Limited by Shares (ÁKK) at EUR 200 Million. The bonds are available for domestic and foreign investors, though the Issuer gives high priority to reaching domestic retail investors. The bonds are distributed by the following partners: the Hungarian State Treasury, Citibank, Erste Investment Pte Ltd, ING Bank N.V, Raiffeisen Bank Pte. Ltd., OTP Bank Plc., and Takarékbank Pte. Ltd.
